Slivv *Protective Paper Sleeves for Bottles*

100% recycled paper sleeves provide a renewable protective alternative to plastic bubble wrap. Unique corrugated shock-absorbing design allows for flat storage and easy packaging, while featuring a bottom closure to keep your wine or other fragile items in place during transit.

IT-SLPRO Slivvs are compatible with our selection of IT-BB2 & IT-BB3 Bottle Boxes.

Ideal for local courier delivery.

SpiroPack ™ Nest Eco

MADE IN THE USA

Spiro Pack Nest is a true Eco product in more ways than one. It is FSC certified, highly recycled and naturally biodegradable. It's dense packaging not only saves money (and therefore fuel) regarding transportation but also saves space when stored compared to traditional bulk fill. The Nest style is cut in narrower channel spirals for added nesting and fill volume. Made from 25# / 40 GSM paper. Each carton weighs 10lbs and contains approximately 2,200 spirals per carton.

24% Higher Value

An independent study conducted by Clemson University proves that product shipped in decorative tissue has a 24% higher perceived value, when compared to the same product & package containing traditional void fill.

Ship the In Store Experience

Decorative tissue brings the "in store" experience to the customers' door! Happy customers mean more re-orders, more likely to recommend, and less returns, based on the same study

E-Commerce tissue rolls can also be used with tissue crumpler devices.

Shown only for demonstration purposes. Not sold by this supplier.

Our Flora-Satin and Sparkalene ribbon are the perfect width for the bow machines and therefore you can be free of star bows with flipped loops. Our ribbons are embossed, which helps the machine grip and pull the ribbon properly. The cores are made to fit the machines so no adapters are needed. These ribbons can also be used on the S-13 pom bow machine, however if you prefer more fabric feel and an easier pull when opening, try satin acetate which can be found on pages **81** & **82**.

Screen Printing

Easily identify the printing method.

Follow the coding system below to identify when printing is available for the products listed in this catalog.

Product Code	Size	Pkg	Wt/Pkg	1	5	10	25+
White Gloss (Economy) Gift Boxes							**FL HS SS**
BX-GE333	3" x 3" x 3"	100	5	27.17	24.11	23.52	22.93

Codes for each print process will be located in the far right side of the header line:
SS = Screen Printing **HS** = Hot Stamp **FL** = Flexo Printing
The letters will appear where that method of printing is available for that item. Print charges are then added to product pricing.

Process printing will not have a code located here.
Instead, it has it's own seperate pricing which includes product, printing & all set up charges.

General Information for Post-Printing

Standard Lead-times:	We strive year round to provide a 10-15 business day lead-time. Lead-times are subject to fluctuations in machine capacity and product availability. The total quantity of impressions will also effect lead-times, please add additional time for more than 5,000 total impressions. For example: the total number of impressions on a 2 color logo printed on 2 sides is 4 impressions per bag.
Approvals:	Signed sales order acknowledgements & proof approvals must both be received before lead-time can begin. If received by 9 am CST, it counts as day one. Please carefully check all details on both the art/placement proof as well as the acknowledgment since a signature confirms the accuracy of all information and is an agreement to all charges stated.
Quantity Pricing by Style:	Post-printing allows us to combine multiple sizes of the same style of product to accumulate toward the per thousand cost, provided one common plate & foil/ink are used. Price categories group product by print pricing and may contain various styles. Examples of different styles are: Euro Bags, Manhattan Bags, Gift Boxes, Jewelry Boxes, Merchandise Bags, Ameritotes, etc.
Plate Changes:	When hot-stamping, changing the plate or foil using a $35 change fee is a good way to obtain quantity pricing. Change fees cannot be used in screen or flexo printing methods. Cannot be used on with short run hot stamp or on second side printing. When printing each side with different artwork, use pricing for 1 sided pricing x 2, as the job requires two set ups and may run on different machines.
Supplied Plates:	Cleaning charges may be required to remove excess adhesive from back of supplied plate before it can be used. $45-$65 subject to review upon receipt. It will also be inspected for wear and defects. If it is determined that the supplied plate will not create a consistent quality impression, a new plate will need to be purchased.
Plate Wear:	If plates have been purchased from us within the last 5 years, and have remained in our possession, we will replace the plate at our cost if needed due to wear & tear incurred by repeating orders.
Rush Orders:	A 30% - 40% upcharge of the printing price (minimum of $100 - $175) will be applied to any order requesting a quicker ship date than current lead-time allows. Additional charges for air freight is required on new plates. Rush charges are subject to changes due to production schedule and time of year. In the 1st & 2nd quarters of the year, quicker lead times may be available with no additional upcharges. Contact customer service regarding current rush opportunities.
Artwork:	We can accept pdf, ai, or eps files. Artwork must be vector and outlined. Jpeg artwork will not provide quality printing in one color printing, and cannot be used for multiple colors. Changes made to supplied artwork will be billed at $75 per hour with $40 minimum charge. We can print up to 45 line screen in Flexo and up to 100 line screen in Screen Printing. In Hot-Stamping half tones do not appear the way they do in ink. Instead a screen adds texture to the solid foil impression.
Proofs:	Up to 2 proofs (per size) are included with each order. Additional proofs will incur a $25 charge per proof. Please check all details on proofs carefully as electronic artwork does not always transfer consistently and minor changes can occur.
Registration:	Screen Printing tolerance is 1/16" shift in any direction between colors. Hot-Stamping tolerance is 1/8" in any direction with no critical alignment Flexo Printing tolerance is 1/2" in any direction with no critical alignment
Coverage:	Hot-Stamping & Flexo Printing cannot tolerate heavy ink coverages therefore we recommend screen printing for those applications.
Merchandise & SOS Bags:	Merchandise and SOS bags are hot-stamped flat when printing one side which creates a ghost impression on the back of the bag. To avoid this, the bags can be inserted; a $65 fee applies.
Restrictions:	If an insert is required to produce a good impression, to be notified & approved prior to production; $105 per 1,000 pieces.
Labeling:	Provided labels can be applied at time of printing or converting for a charge of $15.00 per 100.

4-Color Process Print

What is Process Printing?

Four color process printing is a system where a color image is separated into four different color values: **Cyan, Magenta, Yellow and Black (CMYK).**

By using just these four colors, most of the spectrum or gamut of colors are reproduced, with a total of over **16,000 different color combinations**!

How are colors produced?

When the artwork has been split up in to these four color channels, the amount of density for each is also calculated. The artwork is then printed in a pattern of small dots based on these various densities to create the look of a solid color(s).

Process printing makes it possible to print anything from a simple 1 color logo to a full spectrum photographic image. The possibilities are endless.

When to Process Print?

Process print, although more expensive than other printing options, can be a better option in some cases for your packaging solution.

Good candidates for process printing include:

- Logos containing several colors with tight registration
- Artwork containing photographic images
- Printing on textured substrates, such as E-Flute
- Short-run jobs, since plate/screens are not required

Process printing also has no shift tolerance between colors. So, you can be sure to have your logo printing where and how you want it.

Accepted Art Files:	Vector (preferred) - High Quality & Editable: EPS, AI or PDF files Raster Images - High Resolution Jpeg, 300 DPI or higher. File should be sent actual print size or larger. Not all Jpegs will perform well on non-white substrates.
No Plate Charges:	Pricing includes all set up charges, product and printing charges. No additional plate or screen charges. Must be ordered in full cases. ***Subject to review of artwork and pricing if print area exceeds 75% of print surface.***
Rush Charges:	Regular ship time for process printing, 100 – 500 pieces, is between 7-10 days depending on machine availability. For shorter lead times, please contact customer service regarding current rush opportunities.
Color Matching:	Exact PMS colors are not possible as all colors are converted to CMYK. Reference a Pantone PMS color bridge to see how your PMS color will appear. Prices subject to review of art. Additional charges may apply to orders with excess ink coverage.

Flexo Printing

A rotary system using water based ink and a flexible plate which is mounted directly onto the printing cylinder. The plate is kept on file for future use. It is our fastest post-printing process and quite economical. Product options are limited to paper finishes for ink absorption. Product with handles must be fixed like that of a twisted paper handled shopping bag. Bags with rope handles will not run on this type of printing machine. Single color prints are best suited to this process. When printing multiple colors, registration cannot be critical due to machine variances.

Ink color will vary due to absorption and texture of surface being printed.

Standard Ink Colors For Flexographic Printing

Hot Stamping

This process uses a metal plate in combination with heat, pressure & duration to transfer the foil to the surface of thtr gloss. Each foil has a different backing to adhere to different substrates. Printing colors are limited to available foil from our suppliers. If a specific PMS color is desired, screen printing is the better option. This is the only method to obtain a true metallic image.

2 Sided pricing only applies when same artwork is printed on both sides, use 1c/1s pricing x 2 if not the same. Not all foil colors will adhere to all product types.

Combine for Quantity Pricing

Size Changes are FREE. Combine multiple sizes of the same style of product to accumulate toward the total quantity printed and use that number to determine print charges. This assumes the same plate and foil color are being used on the entire quantity. Same style refers to categories of like product such as Shopping Bags, Gift Boxes, Merchandise Bags etc.

For Example:
An order for 500 Petite shopping bags and 500 Fashion shopping bags using the same 40 square inch plate would be charged a total of $291 for 1 side printing.

If the order were for 1000 Petites and 500 Fashion, again using the same 40 sq inch plate, the print charges would be 1.5 x 291 = a total of 436.50.

What if you want to use TWO different size plates?

Use the $35 plate change fee to obtain quantity pricing.

For Example:
An order for 500 Petite and 500 Fashion shopping bags, using a 25 sq inch plate for the Petite and a larger 50 sq inch plate for the Fashion would be charged $291 (the printing for the larger size) plus $35 to change the plate. A total of $326 for 1 side printing.

If the order were for 1000 Petites and 500 Fashion, again using two different plates, the print charges would be would be 1.5 x 291 + 35 = a total of 471.50

Change fees cannot be used on second side printing. When printing each side with different artwork, use pricing for 1 sided pricing x 2,

Special Effects

Screen Printing

In this method a screen is used instead of a plate. Ink is pushed through a fine mesh screen to transfer the desired image to the product. It is our most versatile process because of its gentle and precise nature. We can match any PMS ink color when printed on a white substrate. When ordering a colored substrate, please be aware that the background will effect the end result and change the color. Therefore, we suggest you request an ink draw down to assure the color meets your customer's expectations. Multiple colors can be accomplished on a wide variety of products. We use UV ink which creates a glossy finish. A matte additive can be requested to remove the gloss; or a metallic powder can be added to the ink to create a brushed metallic look. Screens must be made on every order, repeat or new, as the screen is reclaimed and used again. The film used to make the screens is stored in the file to be used on future orders.

Screen Charges for New Artwork = $75 (per screen/per color).
Repeat Orders (same artwork/size) screen charges waived.

Choose Screen Printing When...

Large Print Area

When your artwork covers a large area. Excessive foil raises the price so Screen Printing is cost effective for these situations

Screened Colors in the Artwork

Use varying percentages of ink to create a print that looks like multiple colors.

Multiple Colors

Discounts for multiple colors. Sizes combine when using the same artwork.

A Specific Color is Required

We mix our own ink which means you get the color you want!

Heavy Ink Coverage

Large coverage in hot stamping means trapped air and broken foil. Screen printing is the solution.

Tighter Registration Between Colors

Our tightest printing option at 1/16" shift between colors.

Gloss or Matte Finish

Our ink is naturally glossy; get an upscale look without using foil. Add matte additive for a natural look.

Larger Print Runs

Price breaks are given for longer runs.

Change Color in Run

$50 Ink wash charge provides the opportunity to change colors while on press.

Sizes Combine for Quantity

No upcharge to combine multiples sizes. As long as they use the same screen, we'll set up the additional size for free!

High Sparkle Glitter Inks
